

Coronavirus Resources

ASCA is working with the Centers for Disease Control on issues related to how schools work with students on issues surrounding the coronavirus and is helping the CDC develop appropriate and effective messages on how to talk to children about coronavirus.

Here are some suggestions and resources to consider as you provide support to your students regarding the coronavirus. Before you take any action, consult with your district to discover any guidance or response initiatives it has in place so your actions align with school and district programs. School counselors also should:

- Encourage parents to limit their children's exposure to the media
- Provide a calming influence to students as needed
- Help students address their fears
